

OneWorld Classrooms

Building bridges of learning between the classrooms of the world.

presents:

The Amazon Rain Forest School Project

This school year, watch your curriculum come alive as your students *travel* electronically with our adventure team to the **Amazon Rain Forest** and interact with students who live there!

Participation Options

[with *Global Competence Matrix* alignment*]

- ◆ Travel electronically via the project Blog, Google Earth tours, videos featuring K-12 students in the Amazon, our *Amazin' Amazon Animal* challenge, and lots more! [Investigate the World]
- ◆ Ask rain forest students and experts your curriculum-based questions. Our traveling team sends back multimedia replies. [Recognize Perspectives]
- ◆ Work together with students in the Amazon to make a global difference, by caring for your local environments. [Take Action]
- ◆ Skype with students in the Amazon, our team of traveling educators and

rain forest experts. [Communicate Ideas]

Open to all K-12 classes/schools!

Our team of educators will send regular electronic content and your students will interact with K-12 students who live in the Amazon. Along the way, you'll seamlessly integrate technology, art, music and global education into your curriculum. For Massachusetts schools, we also offer an assembly program, classroom workshops and residencies.

Curriculum Connections

- ◆ *The Amazon Rain Forest School Project is aligned with the EdSteps Project's *Global Competence Matrix* (see left, in brackets).
- ◆ The project also connects with the following curriculum areas: Social Studies, Language Arts/Poetry, Science, Technology, Art, Music and Spanish.

"Thanks for opening a whole new world - and bringing the sights and sounds of the Amazon Rain Forest - to my students!" Third grade teacher.
